

ARTIFICIAL EYE

ARTIFICIAL EYE the loss of an eye is called anophthalmos and is physically and psychologically traumatic event which has significant influence and impact on the rest of one's life.

Signs/ Symptoms of PAINFUL BLIND EYE

- Cosmetic Disfigurement
- Discharge
- Infections

Causes of ANOPHTHALMOS

- Congenital
- Post-Infective
- Post-Traumatic
- Post-Surgical

Treatment of ANOPHTHALMOS

Prosthetic eye surgery (artificial eye implantation) is a form of reconstructive ophthalmic plastic surgery. Principles of treatment are Surgical Correction by enucleation and placement of ocular implant, followed by a customized ocular prosthesis (COP) or artificial eye to match the fellow eye.

We have an extensive experience in dealing with these complex situations with decent cosmetic results.
